

Three Phase Servo Stabilizer

Applications:

- CNC Machine Tool
- Textile Machines
- Printing Machines
- Packing Machines
- Medical Instruments
- Medical Instruments
- Operation Theater
- R&D Labs
- Offices
- Show Rooms
- Residence etc

Input	: 340 V to 480 V (AS REQUIRED)
Output	: 400 V \pm 1% (Typical)
Correction Rate	: 35 V/Sec
Metering	: Input, Output Voltage
Frequency	: 47 to 53 Hz
Efficiency	: Greater than 97%
Capacity	: 3KVA to 60KVA
Over Load Capacity	: 120% for 60 Sec.
Harmonic Distortion	: Nil
Protection	: Soft Turn On Delay with Low Cut & High Cut optional Complete Surge Suppression Bypass switch Optional

Short Circuit By MCB/MCCB
